

# UNDER PRESSURE

## BETA's Expedited Delivery Program

*Insures Switch Delivery When You Need It*

Delivery time is often an obstacle in getting the products you need, **when you need them**. BETA's Expedited Delivery Program offers customers options on delivery of pressure and temperature switches to meet their requirements.

The **Super Hot Shot Program** allows customers to have up to 4 switches ship within 24hrs of receipt of an order. For a 30% price adder, BETA will manufacture and ship any catalog model including all options (except for Y and Specials).

**Super Hot Shot** orders will be shipped via a BETA appointed carrier only (DHL).

If you don't need the switch to ship in 24 hrs, but can't wait on standard delivery, the **Hot Shot** option may work for you. For a 20% adder, the **Hot Shot Program** will ship your switches in 2-5 days ARO.

Both programs allow only one order per week from a customer. When you absolutely need a pressure or temperature switch to ship in a day, remember the **Super Hot Shot Program** through your local BETA representative.
